Hi coalado,

Do you need something more for the icon/logo integration in the interface? (You have the 512 pixels PNG version in the downloaded zip).

I'll start with the splashscreen design. If you need it has specific dimension please tell me.

Greetings, Ángel C.

Hi,

you can see screenshots of the new version here:

<http://jdownloader.org/es/news/blog/x20090501-001-beta-0.5.547>

You even can download a beta.

I added the current logo to this email.

Yes, I created the icon from scratch and I have the PS file.

I haven't seen the new splashscreen. Can you send me a link or the image?. I also need its dimensions. After that, I'll design the website header.

Greetins, Ángel C.

Hi,

Of course we would add you to our about dialog. Do you have photoshop sources for the logo? Do you already know the new (BETA) splashscreen?

If you like, you could make a new Homepage header, too.

I guess that you made the logo on your own? including the worldimage?

Greetings, Coalado

Hello coalado, I'm Ángel Corral Arias (aka Trazo) and I'm glad you like the icon design. (a few hours ago I have refined the icon doing smoother the water)

While the software is free, you have my permission to use the icon as the JDownloader logo for free. The allowance would be "Ángel Corral Arias" and a link to my web "www.ancoar.com <<http://www.ancoar.com>> <<http://www.ancoar.com>>" appearing on the "About JDownloader" window :)

If you want, I could design a new splashscreen too.

Keep up the good work.

Greetings, Ángel C.

Hi Trazo,

I'm coalado, founder and developer of the downloadmanager JDownloader. I found your Icon on <http://trazo.deviantart.com/art/JDownloader-121464309>, and since

we currently are redesigning JDownloader, we are also looking for a new logo.

We like your Logo very much, and perhaps would like to use

it as
our new JDownloader logo.

It would be nice if you would allow us to use and the logo, and
distribute it together with JDownloader.
Could you send us an email with your allowance ?

Greetings, Coalado
